Welcome...

This Annual, like all those preceding it, is based on the idea that facts are better than rumor, that first person information is more valuable than second hand. Whenever possible, the information presented here comes directly from interviews with the recruits themselves. This policy results in the greatest accuracy possible and provides the clearest picture to the reader. Simply put, The Forrest Davis Recruiting Annual reports what the recruits have to say.

My thanks to all the high school football coaches who have provided information about their players. Players are fortunate to have coaches who care about them. My thanks also to Jamie Newberg and Scout.com for providing the player pictures in the All-South and Top 12 sections. No football recruiting publication is ever complete. There always could be more information out there but the magazine has to go to press at sometime. We hope this issue will serve as a reference for years to come.

This magazine is devoted to the coverage of the elite college football prospect. It does not attempt to list every possible prospect, only high level, division one athletes. We regret that some deserving youngsters are overlooked, but the sheer number of high quality players in the South almost guarantees that some good players will be left out. Even so you can be sure the majority of the south's elite football prospects can be found within these pages.

Ratings are for the readers entertainment and they, like all predictions of human performance, are subject to a multitude of variables and cannot be guaranteed. They are not designed for coaching staffs. Our ratings are simply the best evaluation that experience, expertise and research can provide, given the obvious limitations. They are for your entertainment.

There are thousands of high school seniors who play football in the South every year. However, only a tiny few are considered elite football prospects like the ones found in the pages of the Forrest Davis Football Recruiting Annual.

Presents:

Joe McKnight *2007* *All-South* *Player of the Year*

The Forrest Davis Football Recruiting Annual takes the task of choosing its All-South Player of the Year very seriously. The list of winners is long and illustrious one. The chosen players are different in many ways, but they all seem to have a common characteristic. They all have the ability to call on something more than their competition when the situation calls for it. Simply put they are winners.

Coach J.T. Curtis of John Curtis High School in River Ridge, LA is a demanding coach. Good is not good enough. Great athletic ability won't do you much good unless you are a team player. Discipline and execution are expected and demanded. Even the greatest player is only only part of a team to Coach Curtis. No doubt it is the combination of Coach Curtis' principles, great talent and an unparalleled work ethic that have resulted in one of the most outstanding young players to ever receive this award.

This year's pick for the All-South Player of the year is a measureably great player. Pick a statistic, any statistic and the numbers do not lie. When he touches the ball he is devastating. Receiving? He averages 36.75 yards per catch! Rushing? He averages 14.76 yards per carry. Defensively he plays defensive back so well most teams refuse to throw anywhere near him. And on special teams he is a terror.

Interestingly Joe McKnight is something of the ultimate team player. He just carries out his assignment until his specific number is called and then

the magic begins. Most observers compare him to Reggie Bush. His speed, instant on acceleration and incredible leg strength are certainly in the class of Mr. Bush. In the open field he seems impossible to handle. Against the finest competition he is a star. It is hard to imagine a smoother or more competent player.

Joe McKnight does things on a football field you might expect of a very well trained veteran player, but it is really hard to believe of such a young player.

Basically what you have in Joe McKnight is an explosive athlete with great size who understands the game of football as if he were a college senior. When you watch him play the first thought you have is that he seems like a man playing with children.

I can only think of a handful of players, in over twenty years of watching the cream of the crop, in the Southeast, who could be considered his equal. It would be very difficult to say I have seen one who is better.

The 2007 class of recruits is an exceptional one with excellent prospects at almost every position. As good as many of them are, if I could have only one Joe McKnight would be my choice.

Joe McKnight is a great athlete and a great football player. It is often hard to choose one player, but that is not the case this year. That is why Joe McKnight has been named the 2007 Pepsi Cola - Forrest Davis Football Recruiting Annual All-South Player of the Year.

The Five Star PowerRating System

THE FIVE STAR RATING SYSTEM was devised to assign a value to the potential a high school athlete has in relation to his ultimate performance in college. It also serves as an indication of how soon a given player may contribute to his college team. Basically the idea is to imagine a middle of the pack SEC or ACC type team and ask yourself where a given recruit on that kind of team might fit. The system gives fans an idea of how soon a recruit can be expected to contribute on the field. Interestingly the system also does a good job with long term potential. Over time it has been proven to be an reasonably accurate predictor.

The Five Star Rating System puts all the pertinent information together under one numerical value which can be used to make comparisons. The Forrest Davis Football Recruiting Annual only includes players who rate at the three star level or above, but the system, as originally designed, provided for players below that level.

The system rates a player from three to five with five being the highest possible rating.

Three Star: A player who may start as a junior and can be expected to contribute as a sophomore.

Four Star: A player who may start as a sophomore and contribute greatly as a freshman.

Players of this calibre have a good chance at professional football and college stardom.

Five Star: A player who may start at sometime during his freshman year. Players on this level are strong bets to play pro ball, be All-Americans and win things like Heisman Trophies.

In some instances players seem to fall between two rankings. You will often see rankings of 3.5 and 4.5 in such cases. Hopefully this enhances the accuracy of the system.

After a team has signed all it's recruits, a measure of the relative strength of its recruiting year can be made using the Five Star System.
